SEMTM0029: Financial Technology Group Project

Group Summative Assignments Overview

Academic Year: 2025/26

There are two **group summative assessments:**

- **Group Coursework (50%):** You need to work together in your group to build a distributed financial application (DApp). You need to deploy it to a test-net and host its front-end on an online server. A single PDF format report, including main text and an appendix (Code, URLs, sprint reports, reflections, and others, as outlined in the detailed brief), should be submitted to '**FTGP Group Report**' submission point.
- **Group Presentation (20%):** Each group presents their DApp work in-person.

Details for each part of the assessment are provided in files:

- FTGP-CWBrief-PartA.pdf
- FTGP-CWBrief-PartB.pdf

Please leave plenty of time for your submission, in case of last-minute tech issues.

For each group submission, markers have the right to adjust individual marks based on factors including, but not limited to, teamwork contribution, group work lab attendance, engagement in contact points, group sprint reports, and individual self-reflection essays.

If a student has not adequately demonstrated teamwork (ILO3 - Work effectively in a team to develop a solution to a problem while following a recognised software-development project management method), this may result in the student failing the unit.

The use of generative AI in this assessment falls under **Category 2: Minimal**. You may only use tools such as spelling and grammar checkers in this assignment, and their use should be limited to corrections of your own work rather than substantial re-writes or extended contributions. Regarding use of AI technology, please refer to Bristol guidelines: https://alt.content.bris.ac.uk/bbcswebdav/courses/Study_Skills/using-ai-at-university/

Ensure that your group work is original and avoid plagiarism. Cite any resources, tools, or references used. For more information about academic integrity, please refer to: https://www.bristol.ac.uk/students/support/academic-advice/academic-integrity/
